

Zebra Crossings provides empowerment programs for youth with chronic medical conditions. These are camps and weekend activities with care provided by trained medical staff. We aim to lessen the burden of chronic medical conditions by connecting kids through play and providing respite for caregivers. Zebra Crossings is a fun, safe place to be where kids just get to be kids.

“Zebra Crossings is the only local program where he can participate without any supervision from his parents. More importantly, it is where he can play and explore alongside other kids with some kind of physical challenge that makes them different in their everyday community. “
