

At Zebra Crossings, this idea beautifully reflects who we are. Our children, families, caregivers, volunteers, and supporters come together as a Dazzle—a community where every person is seen, supported, and strengthened by connection. Just like zebras rely on their dazzle for safety and confidence, families facing chronic medical conditions find comfort, empowerment, and joy when they are surrounded by others who understand.

Together, our Dazzle creates a powerful sense of belonging, resilience, and hope—reminding every child and family that they never have to navigate their journey alone.

DAZZLE

A group of zebras is called a dazzle—a name inspired by the way zebras stand together, their bold stripes blending and protecting one another so no single zebra stands alone.
